A BILL

To amend the Public Health Service Act to provide for arthritis research and public health, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “Arthritis Prevention,
3 Control, and Cure Act of 2007”.

4 **SEC. 2. FINDINGS.**

5 Congress makes the following findings:

6 (1) Arthritis and other rheumatic diseases are
7 among the most common chronic conditions in the
8 United States. There are more than 100 different
9 forms of arthritis, which affect joints, the tissues
10 which surround the joint, and other connective tis-
11 sue. Two of the most common forms are osteo-
12 arthritis, which affects approximately 21,000,000
13 Americans, and rheumatoid arthritis.

14 (2) Arthritis and other rheumatic diseases
15 cause severe and chronic pain, swollen tissue, liga-
16 ment and joint destruction, deformities, permanent
17 disability, and death. Arthritis and other rheumatic
18 diseases erode patients’ quality of life and can di-
19 minish their mental health, impose significant limi-
20 tations on their daily activities, and disrupt the lives
21 of their family members and caregivers.

22 (3) One out of every 5 or 46 million adults in
23 the United States suffers from arthritis. The num-
24 ber of individuals in the United States with arthritis
25 will grow as the number of older Americans con-

1 continues to increase dramatically in the next few dec-
2 ades.

3 (4) By 2030, nearly 67,000,000 or 25 percent
4 of the projected United States adult population will
5 have arthritis, and arthritis will limit the daily ac-
6 tivities of nearly 25,000,000 individuals. These esti-
7 mates may be conservative as they do not account
8 for the current trends in obesity, which may con-
9 tribute to future cases of osteoarthritis.

10 (5) According to the Centers for Disease Con-
11 trol and Prevention, the total costs attributable to
12 arthritis and other rheumatic conditions in the
13 United States in 2003 was approximately
14 \$128,000,000,000. This equaled 1.2 percent of the
15 2003 United States gross domestic product.
16 \$80,800,000,000 of such costs consisted of direct
17 costs for medical care, and \$47,000,000,000 con-
18 sisted of indirect costs for lost earnings. National
19 medical costs attributable to arthritis grew by 24
20 percent between 1997 and 2003. This rise in med-
21 ical costs resulted from an increase in the number
22 of people with arthritis and other rheumatic condi-
23 tions.

24 (6) Arthritis and other rheumatic diseases af-
25 fect all types of people of the United States, not just

1 older individuals. Arthritis and other rheumatic dis-
2 eases disproportionately affect women in the United
3 States. 8,700,000 young adults ages 18 through 44
4 have arthritis, and millions of others are at risk for
5 developing the disease.

6 (7) Nearly 300,000 children in the United
7 States, or 3 children out of every 1,000, have some
8 form of arthritis or other rheumatic disease. It is the
9 sense of the Congress that the substantial morbidity
10 associated with pediatric arthritis warrants a greater
11 Federal investment in research to identify new and
12 more effective treatments for these diseases.

13 (8) Arthritis and other rheumatic diseases are
14 the leading cause of disability among adults in the
15 United States. Over 40 percent, or nearly
16 19,000,000, adults with arthritis are limited in their
17 activities because of their arthritis. In addition to
18 activity limitations, 31 percent or 8,200,000 of
19 working age adults with arthritis report being lim-
20 ited in work activities due to arthritis.

21 (9) Obese adults are up to 4 times more likely
22 to develop knee osteoarthritis than normal weight
23 adults. Excess body weight is also associated with
24 worse progression of arthritis, contributing to func-
25 tional limitation, mobility problems, and disability.

1 About 35 percent of adults with arthritis are obese
2 compared to only 21 percent of those without arthri-
3 tis.

4 (10) Arthritis results in 744,000 hospitaliza-
5 tions and 36,500,000 outpatient care visits every
6 year.

7 (11) In 1975, the National Arthritis Act of
8 1974 (Public Law 93–640) was enacted to promote
9 basic and clinical arthritis research, establish multi-
10 purpose arthritis centers, and expand clinical knowl-
11 edge in the field of arthritis. The Act was success-
12 fully implemented, and continued funding of arthri-
13 tis-related research has led to important advances in
14 arthritis control, treatment, and prevention.

15 (12) Early diagnosis, treatment, and appro-
16 priate management of arthritis can control symp-
17 toms and improve quality of life. Weight control and
18 exercise can demonstrably lower health risks from
19 arthritis, as can other forms of patient education,
20 training, and self-management. The genetics of ar-
21 thritis are being actively investigated. New, innova-
22 tive, and increasingly effective drug therapies, joint
23 replacements, and other therapeutic options are
24 being developed.

1 (13) While research has identified many effective
2 interventions against arthritis, such interventions
3 are broadly underutilized. That underutilization
4 leads to unnecessary loss of life, health, and
5 quality of life, as well as avoidable or unnecessarily
6 high health care costs. Increasing physical activity,
7 losing excess weight, and participating in self-management
8 education classes have been shown to reduce
9 pain, improve functional limitations and mental
10 health, and reduce disability among persons with
11 arthritis. Some self-management programs have been
12 proven to reduce arthritis pain by 20 percent and
13 physician visits by 40 percent. Despite this fact, less
14 than 1 percent of the people in the United States
15 with arthritis participate in such programs, and self-
16 management courses are not offered in all areas of
17 the United States.

18 (14) Rheumatologists are internists or pediatric
19 sub-specialists who are uniquely qualified by an additional
20 2 to 4 years of training and experience in
21 the diagnosis and treatment of rheumatic conditions.
22 Typically, rheumatologists act as consultants, but
23 also often act as managers, relying on the help of
24 many skilled professionals, including nurses, physical
25 and occupational therapists, psychologists, and social

1 workers. Many rheumatologists conduct research to
2 determine the cause and effective treatment of dis-
3 abling and sometimes fatal rheumatic diseases.

4 (15) Recognizing that the Nation requires a
5 public health approach to arthritis, the Department
6 of Health and Human Services established impor-
7 tant national goals related to arthritis in its Healthy
8 People 2010 initiative. Moreover, various Federal
9 and non-Federal stakeholders have worked coopera-
10 tively to develop a comprehensive National Arthritis
11 Action Plan: A Public Health Strategy.

12 (16) Greater efforts and commitments are need-
13 ed from Congress, the States, providers, and pa-
14 tients to achieve the goals of Healthy People 2010,
15 implement a national public health strategy con-
16 sistent with the National Arthritis Action Plan, and
17 lessen the burden of arthritis on citizens of the
18 United States.

2 **LATED TO ARTHRITIS OF THE CENTERS FOR**
3 **DISEASE CONTROL AND PREVENTION**
