

HB 2292 -- Red Light Enforcement Systems

Sponsor: Faith

This bill specifies that any person who commits a steady red light violation that is detected by an automated photo red light enforcement system will be guilty of an infraction. Any penalty imposed by an agency for a violation detected by a system will not be deemed a moving violation, made part of the operation record of the person, be subject to merit rating for insurance purposes, or impose surcharge points in the provision of motor vehicle insurance coverage. Points cannot be assessed against any person's driver's license for a violation detected by an automated photo red light enforcement system.
