HB No. 455

**Abstract:** Requires any alcoholic beverage sold in a frozen drink machine, slush machine, or other dispensing device to affix to the device a sign clearly visible to the consumer showing the trademarked alcohol brand or brands contained in the mixture.

Proposed law requires any alcoholic beverage, concoction, or premixed alcoholic mixed drink sold in a frozen drink machine, slush machine, or other type of dispensing device, where the identity of the trademarked alcohol brands are lost in preparation, to affix to the machine system or device a sign, clearly visible to the consumer in at least 36 point type print, showing the trademarked alcohol brand or brands contained in such mixture so that the consumer will be informed.
